EDUCATION

College Of Engineering Guindy

Information Technology Major — CGPA: 8.68

Anna University

2023 - 2027

Sir Sivaswami Kalalaya Higher Secondary School

Percentage in 12th: 97 Percent — School Topper

Mylapore, Chennai

2021 - 2023

PROJECTS

Desktop Billing Software for Retail Shop | *Electron.js, React.js, SQLite, Chart.js, Tailwind CSS* [Link]

- Built a desktop billing app in Electron, used daily by a retail store (50+ transactions/day) with real-time cart updates, PDF invoice generation, and tax calculation
- SQLite for local storage of products and transactions; visualized trends with a Chart.js dashboard.
- Collaborated with store owner, improving UX over multiple feedback cycles.

Astrotype – Typing Game | *C++, Raylib*

[Link]

- Developed a typing shooter game using Raylib C++ where players destroy incoming asteroids by typing words displayed on them.
- Used Trie for fast prefix-matching and Skew Heap to track the top-5 high scores with persistent file-based saving.
- Implemented wave progression, explosion effects, music, and a full game loop with menu, gameplay, and score screens.

Credit Scoring AI Model with Explainability | *Python, XGBoost, SHAP, React*

[Link]

- Built a credit score prediction system using XGBoost to regress credit score based on financial behavior.
- Performed extensive data preprocessing and tuned model with RandomizedSearchCV and evaluated using MAE, RMSE, and R².
- Integrated SHAP to provide users with transparent, human-readable explanations for each credit score prediction.
- Developed a Python backend and React.js frontend to input user data and get prediction insights.

CloudDrop – Cross-Platform File Upload System (Ongoing) | — *Flutter, Go, Cloudflare Tunnel, SQLite* [Link]

- Building a cross-platform system to turn a user's desktop into a personal cloud storage, enabling mobile-to-desktop file uploads via HTTP
- Developed a Flutter desktop app to run a local Go server, exposed using Cloudflare Tunnel; developing a mobile app that connects to server via QR code for file transfers.
- Currently working to add user authentication, upload progress tracking, and encryption for secure file handling.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, HTML, Tailwind CSS

Frameworks & Tools: React.js, Node.js, Flutter, Electron, Raylib, Express.js

Libraries: pandas, NumPy, XGBoost, scikit-learn

Databases: SQLite, PostgreSQL

Developer Tools & Concepts: Git, GitHub, Linux, REST APIs

Soft Skills: Problem Solving, Leadership, Iterative Development, Attention to Detail, Team Work, Communication

CERTIFICATIONS & ACHIEVEMENTS

NPTEL Certification – Python for Data Science

Score: 89%

Hackathon – Tour Guide App (Department-Level)

2023

POSITIONS OF RESPONSIBILITY

Video Editor, The Guindy Times

Jun 2024 – Present

Edited interviews and created social media reels using Adobe Premiere Pro.

Creatives and Initiatives, CEG Tech Forum

Sep 2024 – Present

Designed branding materials and helped organize technical events.
